

### **Dear Media partners!**

We hereby inform you that the annual Engineering Assembly of Russia-2023 will be held in St. Petersburg, Russia, on June 21, 2023. It is a large-scale professional forum and exhibition dedicated to the most promising trends of the domestic engineering. The aim of the Assembly is to integrate representatives of scientific community, education, government and business, to work out joint strategic solutions aimed at the development of engineering in Russia and increase the competitiveness of industrial enterprises in modern conditions.

The organizers of the event are "Cluster of High Technologies and Engineering "Creonomyca" (St.Petersburg) and Peter the Great St. Petersburg Polytechnic University. General partner of the event is Concern R-Pro - a group of engineering companies. The event will take place at the research building "Technopolis Polytech" of SPbPU, 29AF, Polytechnicheskaya street.

### **The Agenda of the Assembly-2023: Digital engineering as a driver for the transition to Industry 5.0.**

The main theses for discussion: domestic software for digital engineering, creation of digital factories, 3D simulation modeling and optimization of production and logistics processes, offline robot programming and digital factory management, innovative modernization of existing production facilities, creation of new rational production facilities, transition to Industry 5.0, industrial robotization and artificial intelligence.

Traditionally, representatives of the largest Russian and foreign industrial enterprises, engineering companies, suppliers of innovative industrial solutions and technologies, leading experts in the field of engineering, government officials take part in the Russian Engineering Assembly.

### **We invite you become a Media partner of the event!**

The Organizing Committee offers you the following opportunities for cooperation:

From Organizing Committee

- your logo on the website;
- the status of an Official media partner;
- accreditation of your staff for the Event;
